The Night Hawk Hybrid

STEALTH
ELECTRIC VEHICLES

Stealth 72 Volt "Hybrid" Nighthawk

The Stealth Night Hawk "Hybrid" is the most innovative multi-functional vehicle ever designed and manufactured in the United States. Our company's objective was to innovate the highest quality and most versatile vehicle on the market. The goal of the design was to have the ability to serve all market segments to include hunting, industrial, commercial, estate, agricultural and recreation.

The key features of the product combine styling and versatility not found in any other vehicle:

- An electric powered vehicle equipped with on the fly charging using the Stealth "Hybrid" technology
- Superior range from the "Hybrid" technology
- Shift on the fly 4-wheel drive
- 2 on demand mobile power outlets
- On demand 12 volt outlet
- A patented convertible "3-in-1" dump bed with the conversion capability for carrying 2- passengers

The development of these key features built upon the electrical foundation of the Stealth 72 Volt Night Hawk has eliminated the limits of performance.

Stealth Exclusive Hybrid Technology

- Our unit uses an auxiliary power unit (APU) that creates and supplies current and has been customized for our application.
 - The APU is insulated to provide quiet performance
 - less than 10 decibels above ambient noise. Total level less than 60 decibels.
- The Power Module amplifies the current from the APU to the battery pack to extend the range of the vehicle.
- The Portable Power Station (pictured on the right) offers the ability to run:
 - 120 volt for power tools
 - 12 volt for accessories

Nothing else has the utility
and versatility of the
72 Volt Night Hawk Hybrid.

Range Anxiety Eliminated – your range
is limited only by the amount of fuel
that you carry!

We offer more than
Superior Range!

The Night Hawk Hybrid is the perfect
mobile workstation for:

- Hunting Camp/Campsite
- Work on the Estate/Farm
- Construction Usage

For Optimum Hybrid  Performance

STEALTH
ELECTRIC VEHICLES

For long range, run your vehicle at no more than 70% of throttle (approx. 15-17 mph) with the APU on. Following this procedure, we have seen up to 80 miles of range.

For extended range, run your vehicle at full speed (safely) with the APU on. Following this procedure, we have seen up to 60 miles of range.

For unlimited range: The unit will keep running as long as the APU has fuel. Bring as much gas to go as far as you want 😊.

The Night Hawk Hybrid

Night Hawk Hybrid Advantage:

The Night Hawk Hybrid is the one vehicle for the user who wants :

- A sporty side-by-side look with shift-on-the-fly four wheel drive!
- A range over 70 miles that is greater than that of any gas or diesel side-by-side.
- A range of up to 30 miles in Stealth mode exceeding other electric side-by-sides.
- The capability of a cargo bed and dump bed for work or play with a large payload!
- An on-board power plant to operate any electric tool or appliance you may need!
- Capability of carrying four passengers comfortably and safely!
- The towing ability to get the job done!

Whether you want to hunt in silence, carry your friends and family, haul firewood, dump top soil, use as a portable power plant or worksite, play in the mud, or simply joy ride with no fear of how far you can go, the Stealth Night Hawk Hybrid is the only vehicle you will ever need to own.

The logo for Stealth Electric Vehicles features the word "STEALTH" in a bold, white, sans-serif font with a black outline, set against a dark, metallic-looking background. The text is contained within a horizontal, shield-like shape that has a 3D effect. Below this, the words "ELECTRIC VEHICLES" are written in a smaller, white, sans-serif font. The entire logo is set against a dark background with red, glowing, curved lines that suggest motion or energy.

STEALTH

ELECTRIC VEHICLES

The New **Night Hawk Hybrid**  is designed with the same exclusive features found in the 2011 Stealth Night Hawk.

Night Hawk Features

- Power Source – Industry Leading 72 Volt Electrical System
 - Standard Flooded Cell Battery Pack
